Automated Shift Filling

Fill vacant shift in minutes with the combined power of UKG Pro Workforce Management and Vocantas's leading Automated Shift Filling solution.

A real-time integration providing simultaneous schedule updates, two-way communications and robust reporting.

- Replace inefficient manual shift phone calls with a **17X faster shift callout process** saving hundreds of thousands of dollars a year.

- Automatically send and receive two-way interactive communications through employees' preferred channels, **promoting greater work-life balance.**

- Shift bids are automatically awarded based on custom rules to ensure the most suitable employees are awarded the shifts, **eliminating potential grievances.**

"With ASF, our schedulers can handle more capacity, so we're able to redirect resources and funds to higher-value tasks"

How it works

UKG

Web Portal

SMS Text

Mobile App

Email

Phone IVR

Vacant shifts are identified, and Vocantas's automated shift callout process is activated.

Employees receive shift callouts through their preferred communication channel, and they can respond to the callout in seconds.

Shift Awarded Communication

Employee Shift Bid

The most suitable employee is awarded the shift, and all employees are automatically notified of the status of their bid.
